

New Ultra Clear ... 'no look' labels for tubes

With an innovative approach to label development Royston Labels now have a unique product capable of providing that special 'no look' label on tubes.

- Made from a unique combination of a specialist Conformable Polyolefin Material and an adhesive that is new to tubes
- Allows the label to become invisible, even on very dark surfaces

Label thickness of only 46 microns - nearly 50% thinner compared to the 89 microns of a standard label!

BETTER FOR THE ENVIRONMENT

News update...

Following extensive research Royston Labels have decided to rebrand and are delighted to launch their new corporate identity...

- Strong, dynamic design... reflecting a quality driven, professional and innovative company

Royston Labels were honoured at the recent European Flexographic Technical Association (EFTA) Annual Print Awards - picking up four awards.
